- Integrated WI-FI for easy internet access

- Built in bluetooth for wireless scale connection

- 8 core processor CPU for ultimate speed

- Android 7.1 system

- Easy to be fixed on the cabiniet

Smart Home Mirror
The smart choice for your home

10:29   25° Clear

Good Morning ,
You look fine today !

My Friends and Relatives

We Customize for your home

In this example, we propose to split the full height mirror (600mm x 2350mm) into three separate mirrors as shown to the left. The upper and bottom mirrors are normal clear-type mirrors that are bonded to the wall surface using adhesives.

The middle portion is made of the Smart Mirror. A wall-box is to be embedded inside this partition wall and the smart mirror (shown in dark gray) will cover this wall box. A power connection is to be provided by others inside this wall box. This Smart mirror is mounted on the wall box using special fixing accessories that enable the mirror to be removed from the front side for maintenance purpose.

The smart mirror can also connect to optional external ceiling speakers for better sound quality.

Customized Features:

- Home automation control

- Quick control for light on/off in the immediate area

- Video doorphone intercom to Visitor Panel and Caretaker

- Video chat using Skype to friends and family

- Integration to health/wellness monitor devices such as weight scale, thermometer, and blood pressure meter

- Background music

- Booking of clubhouse facility

- General Information display such as weather, news and

- Community notices

Magic Fitness Mirror 21.5"
mordern & healthy lifestyle

Fitness Mirror Applications

Lympo Squat uses human pose AI technology and the front camera of smart mirror to help users to perform squat exercises, tracking 17 points on the human body in order to analyze a user's squatting performance and provide real-time feedback.

Lympo Squat leverages gamification and cryptocurrency to keep users exercising over the long term. In addition to earning cryptocurrency for every set of squats, the app includes gamified features designed to motivate users to develop the habit exercising regularly.
